

## COMMITMENT TO EXCELLENCE

WCP Pathology, P.C. is a professional pathology practice and supporting laboratory specializing in anatomic pathology, specialty molecular testing, microbiology, cytology and immunocytochemicals. Our clients include local area hospitals as well as nationally recognized medical centers, ambulatory surgical centers, and independent physician practices.

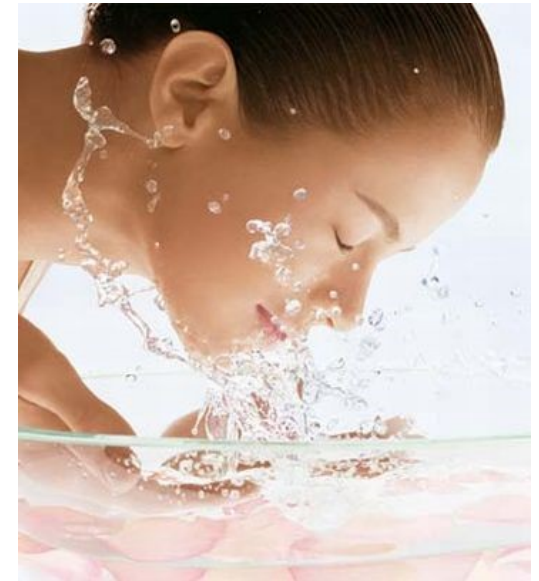

WCP pathologists have a historical presence for over 50 years in the St. Louis area partnering with physicians to diagnose diseases affecting their patients and providing timely, pertinent information to promote effective treatment and rapid recovery. Our independently owned medical practice allows us to focus all of our resources on creating a patient oriented organization which provides superior diagnostics, outstanding service and fosters a close, supportive relationship with clinicians.

We have created a well-rounded team of board certified pathologists who are peers in their fields of expertise and both nationally and internationally recognized. With subspecialty training and board certification in dermatopathology, GI pathology, hematopathology, immunopathology, breast pathology, cytopathology, surgical pathology, uropathology, podiatric pathology, oral pathology and immunohistochemistry, our team of pathologists and support staff are uniquely positioned to provide the highest quality service with the most competitive turnaround time for routine specimens in the Midwest.

WCP is uniquely designed to utilize our superior intellect and technical abilities to provide unequalled service to our physician clientele and their patients.

## ADVANCED DIAGNOSTICS

### REPORTING

At *Cutaneous Pathology*, we offer our physicians and referring dermatologists the best in dermatopathology services, utilizing state of the art diagnostic criteria backed by sound science and a wealth of experience.

Our local facility saves you precious time by providing a full menu of lab services, allowing our pathologists the ability to correlate both the clinical and histopathologic findings for a complete diagnostic summary.

Our fast turnaround and extensive diagnostic capability gives you the service you need, allowing you to concentrate on the demands of your practice. Excellence is our goal. We offer personalized attention and strive for quality communication with our doctors.

- Our reports have a **blue rim** designed to stand out in the patient's chart for easy finding.
- Reports can be faxed, reviewed and printed online or delivered via courier.
- Our reporting incorporates clinical-pathological correlation or literature references when pertinent.
- Consecutive patient biopsies are assigned to the same dermatopathologist to guarantee continuity of care. The patient's previous biopsies are pulled from the system at the time of the case sign out which offers a privileged overview of previous patient care.

### BENEFITS OF IN-HOUSE BILLING

*Cutaneous Pathology* has an internal billing department so you can talk to an actual person at the laboratory when you call, not an automated system. We offer a variety of billing options for our clients which we have listed below:

- ✓ **Medicare/Medicaid billing** – WCP is a participating provider in both Medicare & Medicaid Programs. Additionally, we will file all secondary insurances when they are provided.
- ✓ **Insurance billing** – We can bill third party payers directly. We will bill secondary insurance companies directly when the primary insurance carrier doesn't cover all the costs.
- ✓ **Patient billing options** – We will work with our patients who are uninsured or under financial hardship conditions to help them establish a payment plan that works within their budget.
- ✓ **Client billing** – We will bill the doctor's office directly for laboratory tests as requested.

**WCP Laboratories- *Cutaneous Pathology*** accepts all insurance. Our Pathologists are preferred providers for virtually all insurance carriers.

**Contact our billing department directly at**

**314-787-4000**
